

Developing Code

UCSF Code Development Guidelines:

- Use the UCSF supported modules when ever possible.
- When not possible, use a contributed module (that is stable and widely used)
- Post your specification of your proposed module to the Drupal users group, to see if someone has already solved the problem.
- Let everyone know when you build something new that has application to other UCSF sites (maybe show us at the UCSF DUG!).
- **Only update code in your subsite, not in sites/all where it can impact all hosted sites.**

Getting Code added to sites/all

- **The UCSF Drupal community needs to approve additions to the shared pool of modules**
- **Only stable modules will be added to the pool of shared modules**

Please contact john.kealy@ucsf.edu^[1] if you have any questions or concerns about these guidelines.
